WEBINAR SERIES 2024

SPEAKERS PROFILE

Dr. Brian A. Levine

Dr. Brian Levine is the founding partner and practice director of CCRM Fertility of New York. He has many years of experience in IVF treatment, IUI treatment, PCOS treatment, and many other areas. He is board-certified in both reproductive endocrinology and infertility and obstetrics and gynecology. Dr. Levine leads the industry in normalizing open dialogue about infertility— a medical condition affecting 1 in 8 couples – and educates prospective parents on a national level.

Over the years, Dr. Levine has been cited as one of the nation’s leading fertility experts in The New Yorker, New York Post, NBC, CNN, Avenue Magazine among others, offering valuable insight on everything from fertility misconceptions, egg-freezing 101, to how men can boost their fertility.

Michel De Vos, MD, PhD, is an associate professor in reproductive medicine and senior medical director at the Centre for Reproductive Medicine at UZ Brussel-VUB.

He studied medicine in Ghent, Belgium, and holds a PhD in medicine from the University of Leeds, UK. In 2011, he was recognised as a subspecialist in reproductive medicine and surgery by ESHRE and the European Board and College of Obstetrics and Gynaecology (EBCOG).

His current research activities are focused on reproductive endocrinology, polycystic ovary syndrome, in vitro maturation of oocytes and fertility preservation.

He is the coordinator of the FOTO (Freezing Ovarian Tissue and Oocytes) consortium, encompassing oncofertility research projects at Vrije Universiteit Brussel (VUB), Université Libre de Bruxelles (ULB) and Université Catholique de Louvain (UCL), and he has authored or co-authored over 70 scientific articles.

Prof Michel De Vos
